Women in Green
Hydrogen

Expert Database

The Women in Green Hydrogen Expert Database is a crowd-sourced database of women experts working in the field of green hydrogen.

The green hydrogen sector is filled with outstanding women professionals from all around the world. Our database showcases women's talent, connects experts and decision makers, and offers event organisers a valuable tool to find speakers and disrupt the cycle of men-dominated events.

The goal is to promote equality and diversity in conferences, panels, expert talks, media appearances, advisory committees and management boards - making the world of green hydrogen more inclusive and innovative.

You are an hydrogen expert and want to become part of our data base?
